

DSEAR: Operations and Design

Our training courses bring together over 15 year's experience of delivering DSEAR assessments in a range of hazardous industries.

Our training gives those managing or working in areas with DSEAR risks the insights they need to work safely though understanding the fundamentals of hazardous areas, dangerous substances and effective risk management.

Course Content

- Legislative requirements driving DSEAR
- DSEAR Materials
- DSEAR Risk Assessment
- Basis of Safety
- Overview of zoning concepts and methods of assessment
- Safe handling, storage, and production of flammables
- Management of ongoing DSEAR requirements

Learning Outcomes

- Knowledge of DSEAR requirements and how this applies to your role
- Ability to identify DSEAR hazards
- Understand the preparation of detailed risk assessments following the hierarchy of control
- Implementation of effective controls to achieve the 'Basis of Safety'
